

Vedamrit Plan

Point 1-

Free registration- user will be allowed to do registration without any registration fee

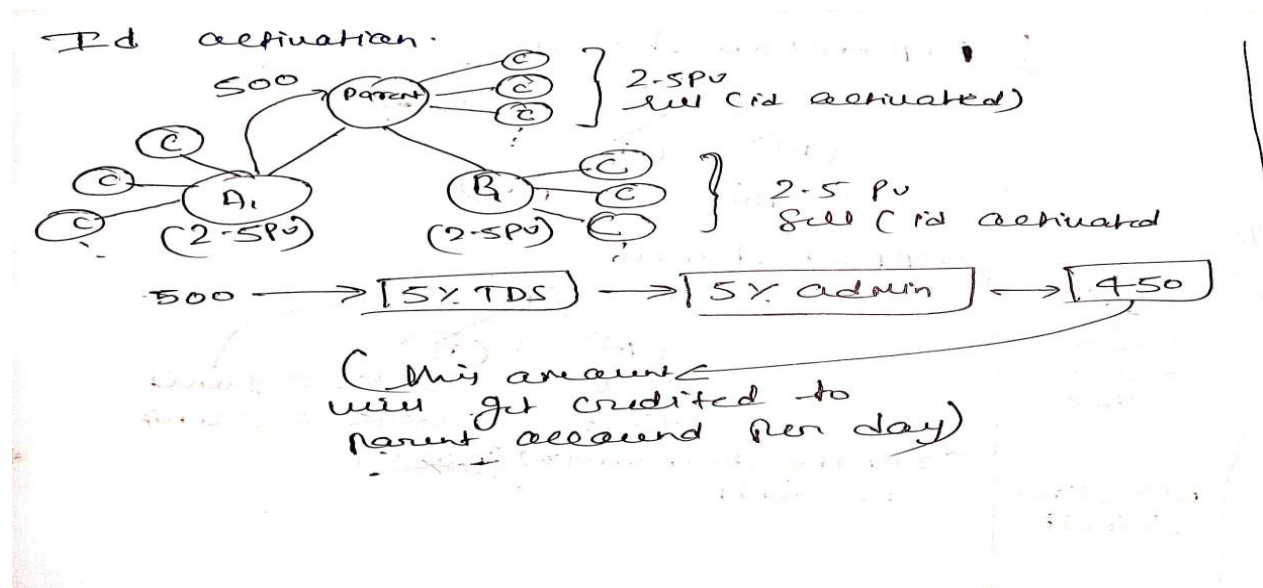

Point 2-

Id activation-

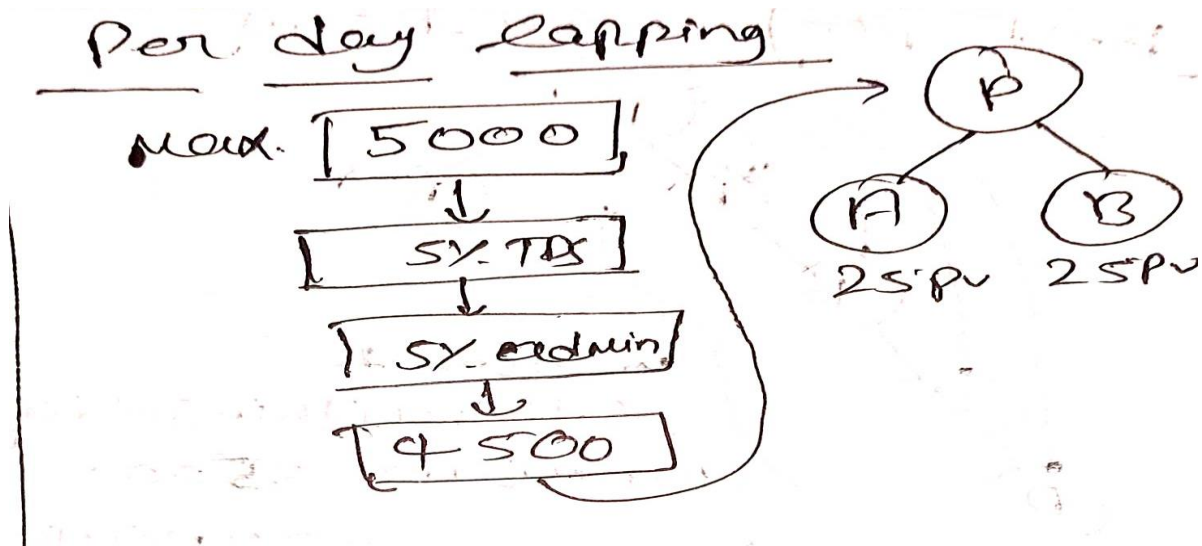

Suppose there is parent who want to activate his id so he/she should make 2.5 pv by selling the to multiple customers and then their id's will get activated otherwise not

And if the parent join two more people in his/her network they also need to make 2.5 pv to get their id activated

And if the first two referrals(left and right) of parent get succeed to make 2.5 pv then 500 profit/commission will be given to parent.

Capping- per day capping should be only 5000rs or 25 pv and that will get credited as shown below:

Bonuses

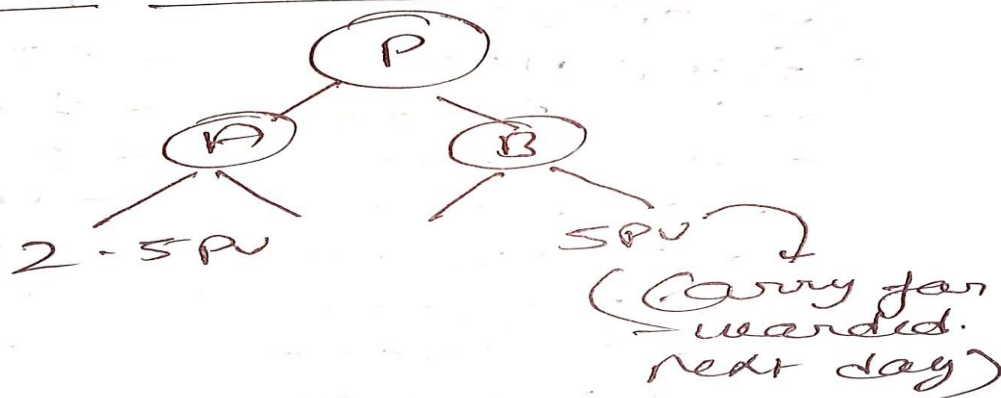

Team building bonus(per day):

In team building the per day target will be 5000

If the pv is greater than 2.5 pv on one side and 2.5pv is on other side, the greater one will be carry forwarded

And if both are equal and greater than 2.5pv then anyone will be carry forwarded as shown below:

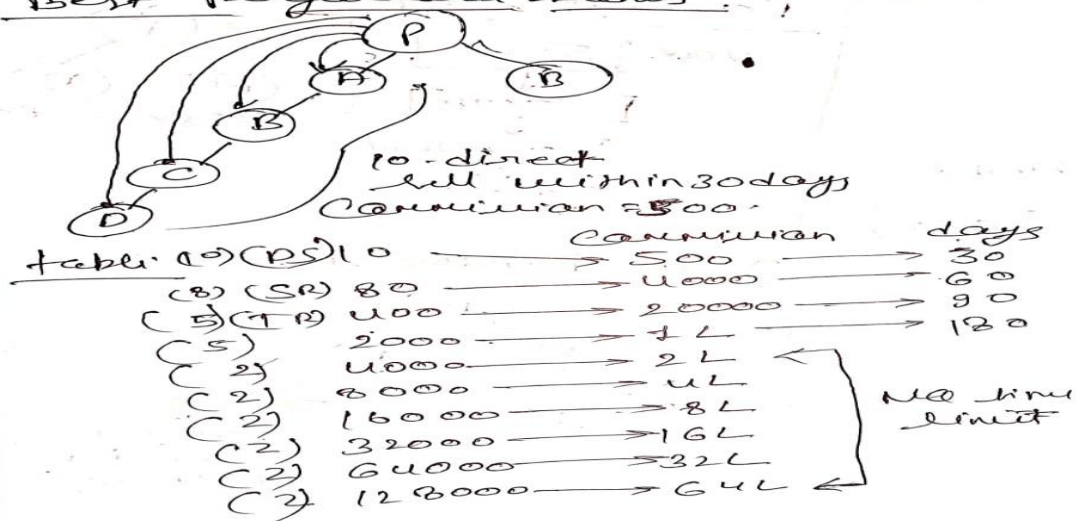

Team building bonus :-

Best performance bonus(per day):

The best performance bonus is based on direct selling process and second third till 10 referrals. If the parent able to make 10 direct referrals 7 at right and 3 at left or vice versa then the parent will be credited with amount 500 and same for the second referral, third till 10 referrals as well. Please go through the following diagram to know the number of referrals, commission and the maximum day allowed to get commission.

Best Performance bonus :-

Repurchase(weekly):

This method is based on BV(business volume)

This repurchase method follows the minimum business volume criteria like, if the left has made 2.5 bv and other side that is right side made 5 bv then the minimum bv value(10%) will be credited to parent account.

Support bonus:

We will make table for this

This support bonus will be credited to parent account as per th company turnover divided by total unit they made

Company turnover(10%)/per unit

Suppose if the left and right side made 30k purchase then 1unit will transferred to parent.

If 60k then 2 unit andso on

But the criteria is that both the side have to make atleast 30 thousand of purchase to complete their 1unit.

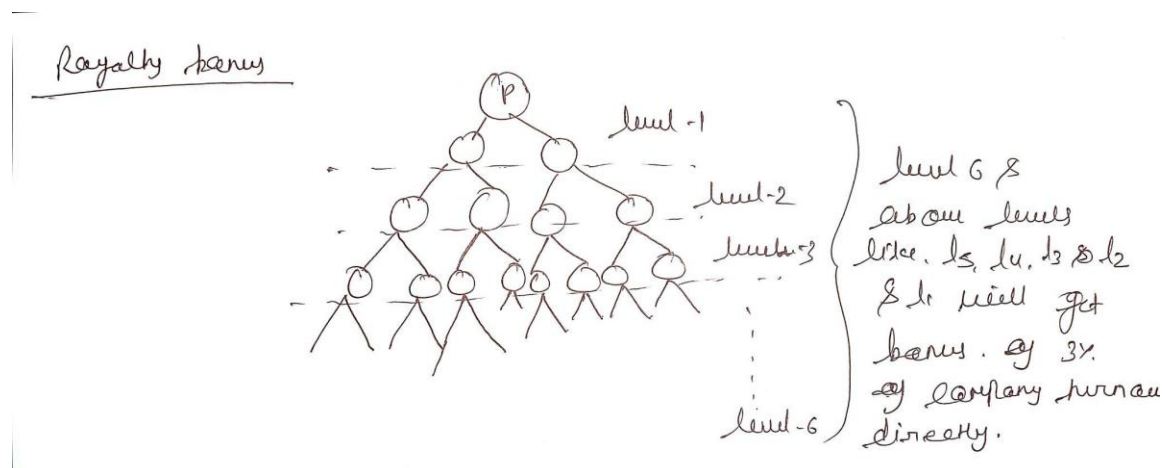

Leadership bonus:

In this if the parent make 300bv by self then the parent will be credited with 5% amount of company turnover directly.

And if there left and right side made 20-20 bv then also the parent will get 5% of company turnover directly.

Royalty bonus:

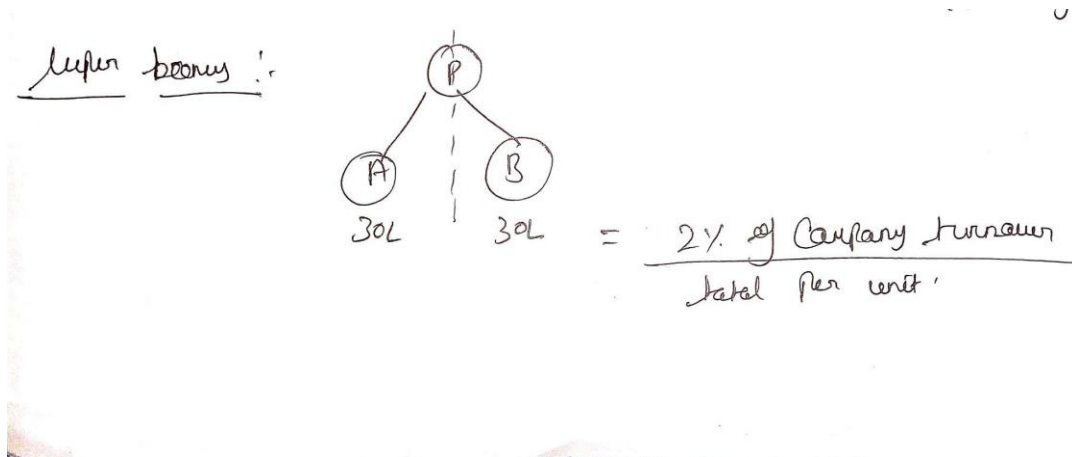

Level 6 and above will get 3% of company turnover

Super bonus:

If both left and right side of parent made purchase of 30L-30L then the commission will be distributed as below:

2% of company turnover/total unit

**Reports:**

- Payout report
- Payout statement
- Teambuilding bonus report
- Repurchase report

Franchise:

If someone wants your product in large quantity for reselling then the product will be provided to them in some discount.

INTRODUCTION-

Binary Tree MLM Software, a revolutionary solution designed to empower businesses in the dynamic realm of multi-level marketing (MLM). Our Binary Tree MLM Software stands at the forefront, offering a robust platform that seamlessly integrates advanced features, intuitive interfaces, and unparalleled customization capabilities.

With Binary Tree MLM Software, companies can unlock new avenues for growth, streamline operations, and enhance efficiency like never before.

Designed with precision and innovation, this software leverages the concept of binary trees, a fundamental structure in MLM, to optimize network management, commission distribution, and performance tracking. Through a user-friendly interface, administrators gain comprehensive control over their network, while distributors enjoy enhanced visibility, real-time insights, and streamlined communication channels.

PURPOSE OF THE DOCUMENT:

This SRS (software requirement specification) is basically a blueprint of your software. It includes all the requirements, modules and sub modules we have discussed in detail.

This SRS document includes a detailed workflow of the software by which client will be able to understand what are the modules and submodules in software and with its features and milestones and understand how this software is going to work.

PROJECT SCOPE:

This software is designed to facilitate the management of network structure, commission calculation, members interaction and business operation.

Key features include (ADMIN):

- Admin can view new joiners, total sales, reports of referral commission, top earners and recent joiners.
- Admin can view genealogy tree where parent and child will be in of binary tree format.
- Admin can also add new users by filling some of the details like, introduce name, parent name, username and select the package.
- Admin is also allowed to check finance part where they can view commission wallet and business wallet.
- Can check the total commission, available balance and user referral of users.
- Can manage the content also like, add product and enable/disable product.
- Admin has an authority to deactivate and unblock users and change their credentials as well.
- Can view reports such as, joiner report, top earner report, block/unblock report, commission report, sales report and repurchase report.

- Only after admin's validation the user can refer himself to anyone.
- Admin will be able to see the sold products of the user.
- Admin will have the power to hide a particular side of the tree of any user.

FEATURES:

Member Management: Allows administrators to manage member profiles, registration.

Commission Calculation: Automates the calculation of commissions and bonuses based on predefined rules, sales volumes, ranks, and other performance metrics.

Rank Advancement: Tracks member performance and achievements to determine rank advancements, unlocking additional earning opportunities, bonuses, and incentives.

Genealogy Tracking: Enables administrators and members to view and track the lineage, hierarchy, and relationships within the binary tree structure.

Real-Time Reporting: Provides real-time insights into network performance, sales activities, commission earnings, payouts, and other key metrics through interactive dashboards and reports.

E-Wallet Integration: Facilitates secure electronic fund transfers and commission payouts to member e-wallets, allowing for convenient

financial transactions and withdrawals.

Communication Tools: Includes built-in messaging systems, notifications, and alerts to facilitate communication, collaboration, and support within the MLM network.

Customization Options: Allows administrators to customize features, branding elements, compensation plans, and user interfaces to align with their specific business requirements.

Security and Compliance: Implements robust security measures, encryption techniques, access controls, and compliance features to protect sensitive information, ensure data integrity, and adhere to regulatory requirements.

Scalability: Built with scalable architecture to accommodate the growth of the MLM network, expanding user base, and increasing transaction volumes without compromising performance or stability.

VEDAMRIT(USER APP)

INTRODUCTION-

Binary Tree MLM Software, a revolutionary solution designed to empower businesses in the dynamic realm of multi-level marketing (MLM). Our Binary Tree MLM Software stands at the forefront, offering a robust platform that seamlessly integrates advanced features, intuitive interfaces, and unparalleled customization capabilities.

With Binary Tree MLM Software, companies can unlock new avenues for growth, streamline operations, and enhance efficiency like never before.

Designed with precision and innovation, this software leverages the concept of binary trees, a fundamental structure in MLM, to optimize network management, commission distribution, and performance tracking. Through a user-friendly interface, administrators gain comprehensive control over their network, while distributors enjoy enhanced visibility, real-time insights, and streamlined communication channels.

PROJECT OVERVIEW:

- As we know that binary tree mlm software is used for network marketing purpose to sell products and services.
- This software is a platform from where the user refer and earn commission based on number of users they added to their network.
- If user1 add min 10 people in their network they will earn commission upto 500
- And if the user add min 80 people to their network they will earn upto 4000rs as a commission
- User will be allowed to see their level in hierarchy
- User can view their commission that how much commission they all have earned per day, week and monthly.
- User will also be allowed to place order where they need add product in cart and place order to checkout.
- User will login through 8 digit login User I'd and password.
- Customers will also be able to login and see the products ordered for them.
- User's designation can be seen along with their name.

FEATURES AND MODULE

MODULE

Sno	Major modules	Sub modules	Sub-sub module
1	login/Register		
2	Dashboard	Joining	
		Total referral	
		E- wallet	

		Wallet balance	Request payout
		Payout overview	Paid payout Pending payout
3	Network	Referral list	
		Downlist	
4	Signup	Sponsor	
		Personal	
		Payment	
5	Package upgrade	Pay now	
6	Repurchase	Shop	
		Add to cart	Checkout
7	Profile	Change credentials	Submit
8	PV history	Personal	
		Group	
9	Report		
10	Logout		

Module 1-

Login/register- User need to login using their credentials like, username and password if they have already registered

If the user is new so they need to register themselves first by filling some of the details and referral id.

Module 2-

Dashboard - When user get registered/login themselves in software they will be redirected to a dashboard page where they can view joinings, total referrals, e- wallet, wallet balance where they can request for payout as well and payout overview where they can view paid and pending payout.

Module 3-

network - This section of user side allow user to view their referrals lists,downlist and many other lists.

Module 4-

Signup- In this section user will fill some of the details like, sponsor, personal where they can choose any packages they want to purchase and after filling allthese information/details user will be redirected to payment page.

Module 5-

Package Upgrade- Here user can submit request to upgrade his package afterapproval of admin user will be redirected to payment page.

Module 6-

Repurchase- This section of the app redirect user to shop module from wherethey can select product they want to buy and add it to the cart for checkout process.

Module7-

Profile- Here user can change their credentials like change password, changemobile number or change transaction details and submit the same to get approved or change by the admin.

PV history- User can view personal and group wise PV history as well.

Module 9-

Report- In this users are allowed to view various kind of reports such as commission report, sales report, referral lists and so on.

Module 10-

Logout- Using this section user can get logout from their profile

APP CONSTRAINTS:

Language used

Frontend-

- HTML(hypertext markup language)

- CSS(cascading stylesheet)
- JAVASCRIPT

Backend-

- PHP(hypertext preprocessor)
- Python
- NodeJs

Database constraints

Database:

- My SQL

Cultural constraint

- Human being can act with this app.
- Anyone who have the knowledge of app or computer can operate thisapp.

Legal constraint

- Copyright protection and intellectual property right must be kept in mind.
- Copying any content of our app it is illegal with according to all.

User constraint

- These apps are developed for the admin and users, it has more graphicscontrol rather than textual controls. Text can be added where required.

AMC(annual maintenance charge)

The annual maintenance charge will be 20% of project budget per year.

NON FUNCTIONALITIES:

Security:

This portal will must be secure from unauthorized users

Authentication: Portal requires the admin identification using mail and password. Login credentials: admin must have proper mail and

password to get into the dashboard.

Admin right: Admin will be able to view and modify the information.
Performance requirements Maintainability: the portal has a feature of maintainability.

User right- user will be able to view the details like commission report, referral report, sales report and all and can also shop products.

Back-up: server will provide the capacity to backup the data
confidential Errors: portal will keep a log of all the errors.

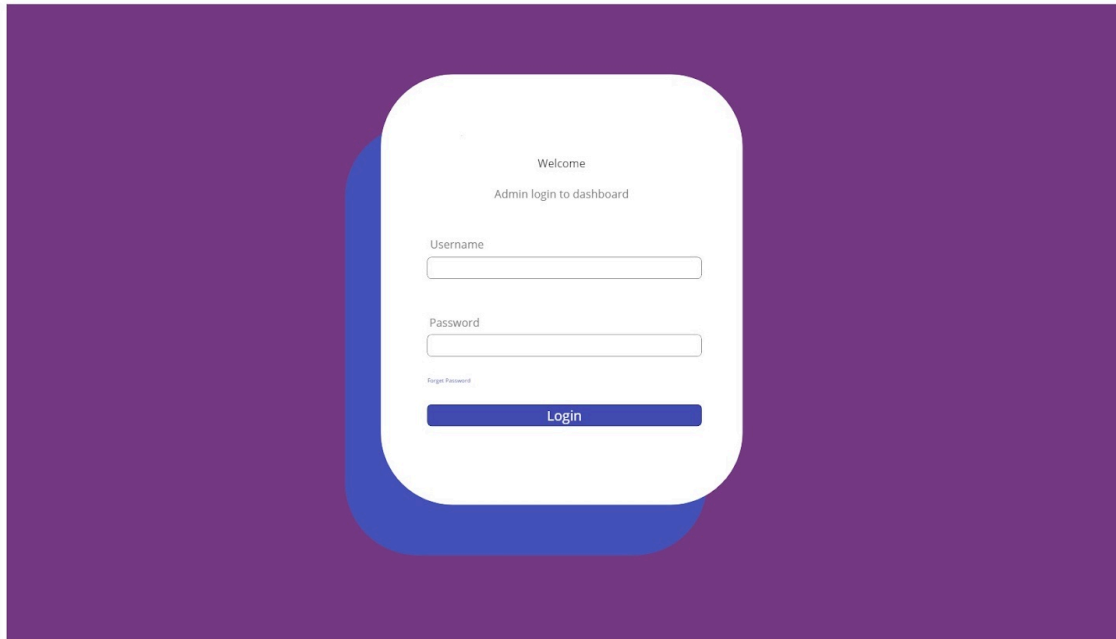

ASSUMPTIONS AND DEPENDENCIES:

- It is assumed that the app will never down in future.
- It is assumed that the app will work effectively.
- It is assumed that the work of the project will complete on time.

MILESTONE

SNO	MILESTONE	DATE REACHED
1	Technical and design specification	5 days
2	UI design	7 days
3	Development	10 days
4	Testing	5 days

NOTE- This is primarily SRS, which needs to get validated, update with changes and share revised version with complete screen details.
